

## ROPOBANK\_PORTFOLIO

Generated by Doxygen 1.13.2

# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

AccountSettings . . . . .	??
IAccount . . . . .	??
BaseAccount . . . . .	??
CheckingAccount . . . . .	??
SavingsAccount . . . . .	??
Portfolio . . . . .	??
TransferRecord . . . . .	??
TxRecord . . . . .	??

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">AccountSettings</a>	Hold Account settings for specific account . . . . .	??
<a href="#">BaseAccount</a>	A base class that shares common data and default behaviors for all account types . . . . .	??
<a href="#">CheckingAccount</a>	Represents a checking account that supports monthly fees and specific settings . . . . .	??
<a href="#">IAccount</a>	Interface for all account types . . . . .	??
<a href="#">Portfolio</a>	Manages a collection of financial accounts and provides operations for transactions, transfers, and exposure calculations . . . . .	??
<a href="#">SavingsAccount</a>	Represents a savings account that accrues interest . . . . .	??
<a href="#">TransferRecord</a>	Stores detailed information about a fund transfer transaction . . . . .	??
<a href="#">TxRecord</a>	Represents a single transaction record . . . . .	??

# Chapter 3

## File Index

### 3.1 File List

Here is a list of all files with brief descriptions:

<a href="#">cal.cpp</a>	.....	??
<a href="#">cal.hpp</a>	.....	??
<a href="#">main.cpp</a>	.....	??
<a href="#">portfolio.cpp</a>	.....	??
<a href="#">portfolio.hpp</a>	.....	??

# Chapter 4

## Class Documentation

### 4.1 AccountSettings Struct Reference

Hold Account settings for specific account.

```
#include <portfolio.hpp>
```

#### Public Attributes

- [AccountType](#) type
- double [apr](#)
- int64\_t [fee\\_flat\\_cents](#)

#### 4.1.1 Detailed Description

Hold Account settings for specific account.

#### 4.1.2 Member Data Documentation

##### 4.1.2.1 apr

```
double AccountSettings::apr
```

##### 4.1.2.2 fee\_flat\_cents

```
int64_t AccountSettings::fee_flat_cents
```

##### 4.1.2.3 type

```
AccountType AccountSettings::type
```

The documentation for this struct was generated from the following file:

- [portfolio.hpp](#)

## 4.2 BaseAccount Class Reference

A base class that shares common data and default behaviors for all account types.

```
#include <portfolio.hpp>
```

Inheritance diagram for BaseAccount:

### Public Member Functions

- **BaseAccount** (const string &id, const **AccountSettings** &settings, long long opening\_balance=0)  
*Constructor of the **BaseAccount**.*
- const string &id () const override
- long long balance\_cents () const override
- const vector< **TxRecord** > &audit () const override
- void deposit (int64\_t amount\_cents, int64\_t ts, string note=nullptr) override  
*Deposits into the account.*
- void withdraw (int64\_t amount\_cents, int64\_t ts, string note=nullptr) override  
*Withdrawal from the account.*
- void charge\_fee (int64\_t fee\_cents, int64\_t ts, string note=nullptr) override  
*Apply fee to the account.*
- void post\_simple\_interest (int days, int basis, int64\_t ts, string note) override  
*Post simple interest to account balance.*
- void apply (const **TxRecord** &tx) override  
*apply a transaction to the account*

### Public Member Functions inherited from **IAccount**

- virtual **AccountType** type () const =0
- virtual ~**IAccount** ()=default

### Protected Member Functions

- void record (const **TxRecord** &tx)  
*Records a new transaction in the audit trail.*

### Protected Attributes

- string id\_
- **AccountSettings** settings\_
- int64\_t balance\_cents\_
- vector< **TxRecord** > audit\_
